

Compare what you might hear on TV or in school with what the Bible and scientific evidence actually tell us.

- ✓ God created dinosaurs and people on Day 6 of the creation week only thousands of years ago.
- ✓ Dinos lived at the same time as people, though probably not in the same places.
- ✓ Scientists are finding real blood cells, leftover skin, and bone inside many fossils! This means dinosaurs were alive a lot more recently than many people think.

Help the scientist find the fossil.

Unscramble to find this dino's name:

LOCOPIDSUD _____

Discovered: 1877 in Colorado

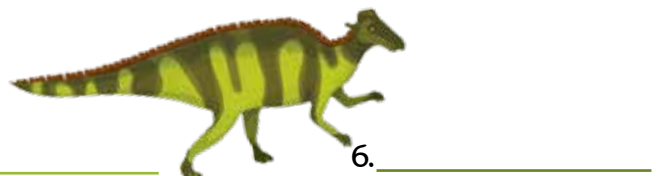

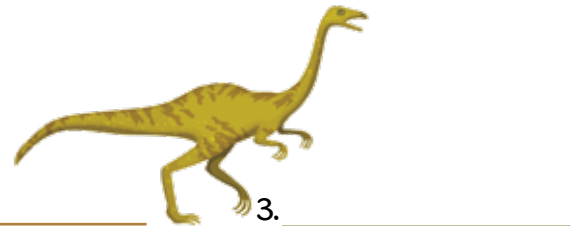

Name Means Double Beam

Answer: Diplodocus

Write the dinosaur name next to the correct image.

- Lambeosaurus Struthiomimus Ankylosaurus
Parasaurolophus Stegosaurus Velociraptor

Answers: 1. Velociraptor, 2. Parasaurolophus, 3. Struthiomimus, 4. Ankylosaurus, 5. Stegosaurus, 6. Lambeosaurus
